## 6v5 watt solar panel

What is a 6V 5 watt solar panel?

The Suner power 6V 5-watt panel converts solar energy into 6V electricity. It charges batteries and prevents battery drainage in all seasons. Suner Solar Power is great for golf carts, motorcycles, security devices, motorcycles, or any other application that uses a 6V battery.

What is a 5 watt solar panel made of?

This 5-watt solar panel consists of 156 monocrystalline cells, which can maybe be used with solar power managers. It can withstand extreme weather conditions. The frame is made of anodic oxidation aluminum alloy material. The backboard is made of 0.25mm PET (polyethylene terephthalate) material.

What is a 5V solar panel?

Think again! In modern times, various manufacturers provide small and highly efficient solar panels such as the 5V solar panel. The silicon cells in this panel capture sunlight to produce electricity like other solar panels. Then how is it different from other solar panels?

What are 6 volt solar panels used for?

These 6 volt solar panels are great for charging your 3.7V DC batteries and ideal for use in off grid applications such as GPS tracking, educational kits, small electronic devices, LED lighting etc. Click here to watch the video of this type of custom solar panels.
