# Are solar panels worth investing in

Are solar panels worth the investment?

For more and more homeowners going solar, batteries are becoming essential, rather than a nice-to-have, for peace of mind and maximum savings. While solar works for most homeowners, certain situations make it less attractive or financially unviable. Here's when solar panels typically aren't worth the investment:

Is solar a good investment?

Here's when solar is typically worth it: Solar panels are a long-term investment that generate free electricity for 25-30 years. If you own your home, you'll capture all those benefits. Renters should speak to their landlords before making plans to install a solar energy system. The more you pay for electricity, the more you'll save by going solar.

Can solar panels save you money?

If your state has robust net metering or you have high energy costs, your solar panels could start saving you money in (relatively) short order. If you aren't planning on moving for many years or have reason to believe the short-term energy savings and the boost to your home's value will recoup your investment, solar could pay off.

Do solar panels increase property value?

Solar panels are attractive to potential new homeowners when you next sell your home, which can increase your property value as a result. That might seem like a long time, but it's worth remembering that solar panels can provide all of your energy needs, making your home potentially energy self-sufficient.

It seems as though solar panels have been cropping up on properties across the country for a few years now as the popularity of renewable power increases. But while ...
