# Automatic Folding Container Used at Cameroon Airport

Why should airports use automated container unloaders?

With minimal operator intervention required, the Automated Container Unloader enhances operational efficiency and reduces labor costs. By automating the unloading process, airports can streamline their operations and allocate resources more effectively, ultimately improving overall productivity and performance.

What is automated container unloading?

Our Automated Container Unloading system streamlines the baggage unloading process and minimises the need for operator intervention while maximising productivity. By leveraging automation technology and innovative design, our Automated ULD Container Unloader ensures that bags are efficiently removed from ULDs with precision and speed.

Which airports use automatic baggage loading system?

Highlights: The world's first automatic baggage loading system now used by major airports - Amsterdam Schiphol, Frankfurt Fraport and London Heathrow. Fully automatic loading, with a cycle time of 15 seconds per bag. Supports most popular ULD (unit load device) types and can be configured for new ULD types.

What is able (automatic baggage loading equipment)?

ABLE (automatic baggage loading equipment) is a robotic system which loads passenger baggage into containers at airports. Whilst this task is still predominantly performed by men in most airports around the world, ABLE was the first automated system to replace humans with robots at Amsterdam Schiphol, Frankfurt Fraport and London Heathrow.
