
Bucharest Mobile 5G Base Stations Exceed 100

Does Romania use Chinese technology in 5G networks?

In September 2019, the former US Ambassador to the European Union praised Romania for not using Chinese technology in its 5G networks. In January 2020, the US Embassy in Romania issued a statement emphasising that companies connected to an authoritarian government like China could not be trusted.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

Where is 5G available?

Currently, the 5G network is primarily available in major cities, however, efforts are being made to expand coverage to other areas as well. It is expected that operators are already working on providing the 5G network to stadiums, airports, and other special premises. 5. What public tenders have awarded spectrum licences?

How many 5G base stations will India have by 2025?

The country has set an ambitious goal of deploying over 500,000 5G base stations by 2025, a target driven by telecom giants like Reliance Jio and Bharti Airtel. The Indian government has actively supported 5G expansion, conducting large-scale spectrum auctions and offering incentives for infrastructure development.
