
Communication with base station failed

Why is my base station not broadcasting?

The software sets up all radio and receiver operating parameters, and is the most likely route to a successful problem resolution once you have checked all connections, cables, and batteries. The base station is not broadcasting. See Base station is not broadcasting below. Incorrect over-the-air baud rates between base station and rover.

How do I reconnect a phone to a base station?

Unplug both the power and communication cables from the base station, reconnect the cables, then replace the handset in the base station. Wait until the handset indicates that it is linked (with an audible signal) before attempting to connect again. Make sure the base station is connected to power.

What if my Gigaset handset is not registered on a Gigaset base station?

If your Gigaset handset is not to be registered on a Gigaset base station, first prepare the desired base according to the manufacturer's instructions. The following steps only describe the registration procedure for a Gigaset handset on a Gigaset base station.

Why is my scs900 radio not receiving data?

If the radio is receiving data (the Radio LED is flashing) and the receiver is not receiving data, check the port settings of the receiver and radio using the Siteworks or SCS900 Site Controller software; match the settings and try again. The radio antenna cable and GPS antenna cable are mixed up.
