## East Asia Base Station Computer Room EMS

What is delta's environment management system (EMS)?

Delta's Environment Management System (EMS) monitors the environment and conditions in the data center, including temperature, humidity, water leakage, and alarms for fire, smoke, and unauthorized entry. The EMS offers IT managers an integrated platform for more convenient monitoring of today's data center.

What is envirostation EMS & how does it work?

The EMS offers IT managers an integrated platform for more convenient monitoring of today's data center. EnviroStation integrates the monitoring of the data center's environment and other conditions, and sends the data to a central manager via network. User-defined alarms ensure the data center's security.

What is Stratus EMS?

The Stratus EMS monitors, delivers alarms, and data logs 64 input/output points from Modbus inputs in addition to 12 universal digital or analog inputs. It supports Modbus RTU/485 and Modbus TCP which make it capable of reading data from many IDF, PDU, UPS and Building Automation Systems.

Environment Monitoring System (EMS) Environmental monitoring systems prevent hardware damage to server rooms, data centers and network closets with critical condition alerts and ...
