
Energy storage pack solution

What is the ENERGYPACK solution?

The ENERGYPACK solution is a scalable, all-in-one microgrid solution that stores electricity from any source - diesel or gas-powered gensets, wind turbines or solar panels - and delivers it when needed. It includes a genset and a circuit breaker.

What is the Energypack and how do I use it?

The Energypack is a backpack that can store energy and recharge held electric tools. It is power tier 3 (it can only be charged in an MFE or MFSU) and can hold up to 2 million EU. To use the Energypack, it must be charged and equipped in the chestplate armor slot.
