Natalie's focus lies in the areas of finance, sustainability, business communications, and more. She and her content team have been published in reputable sites like EcoWatch, Sunday Post, Earth911, and more. Solar PV inverter replacement costs in the UK start from £500.

How long do solar power inverters last?

While most solar power inverters come with a lifespan of approximately 5 to 10 years, they do require regular maintenance in order to ensure optimal solar PV inverter efficiency.

What is a solar power inverter?

Without getting too technical, a solar power inverter is a large component within a solar panel system that converts the direct current (DC) produced by your solar panels into ready-to-use alternating current (AC) to power your home. Most inverters typically have a conversion efficiency between 93% and 96%.

How much does a string inverter cost?

Most string inverters come with a 5- to 10-year warranty that can be extended for a premium. Considering most solar panels come with a 25-year warranty, it goes without saying that you will at some point have to replace your inverters. The average solar PV inverter replacement cost of a string inverter typically ranges from £500 to £1500.
