
Garden solar lighting control system

Are solar lights good for your garden?

Solar lights are environmentally friendly lighting and with a good set, you can create an ambience that lets you enjoy your garden long after dark. Powered by solar panels, they absorb daylight and convert it to electrical energy, charging your lights so they're ready to go at night.

How many hours can a solar light bulb light a garden?

The warm white solar LED bulbs are bright enough to light a path, boundary or entranceway and offer up to 12 hours of light in the summer, although there's an on/off switch to avoid disturbing neighbours or garden wildlife.

What are solar lights used for?

Spotlights: These solar lights are used for lighting up a single area or highlighting trees and shrubs. They also double as security lights, as they're good for dark spots that could use brief bursts of bright light, like the front of sheds when you're locking or unlocking a door, or alleyways when you're putting the bins out.

How can solar energy be used in the garden?

Solar energy can be used in the garden to power simple mechanisms like the water pumps in solar water features or - in this case - light bulbs, to make solar lights. If you're updating your social space, find inspiration with our round ups of the best garden furniture, parasols, garden loungers, deck chairs, and hammocks.
