# Georgia Solar Electric Systems

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Why are solar panels so popular in Georgia?

Solar panels have become increasingly popular in the state of Georgia. In recent years, solar energy installation has risen steadily in response to its multiple benefits for both residential homes and commercial businesses. Solar panels provide an alternative energy source, reducing dependence on natural gas and electricity.

Are solar panels a good investment in Georgia?

Contact us now to start saving money on your power needs with a system more reliable than your electric utility can provide. Solar panels have become increasingly popular in the state of Georgia. In recent years, solar energy installation has risen steadily in response to its multiple benefits for both residential homes and commercial businesses.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.
