
High-Temperature Resistant Energy Storage Containers for the Catering Industry and Retail

What is a Feurer insulated container?

FEURER insulated containers offer the ideal solution for the transportation and storage of temperature-sensitive products. Whether food, medical products or sensitive goods - our insulated containers ensure reliable temperature maintenance to keep your products fresh and safe at their destination.

What is a heat-resistant energetic material?

Usually, when the thermal decomposition temperature reaches 250 °C, it can be referred to as heat-resistant energetic material. In addition, when the thermal decomposition temperature reaches 350 °C or higher, it can be classified as an ultra-high temperature heat-resistant energetic material.

What is a thermocontainer Max?

Lightweight yet stable, it protects products from temperature fluctuations and thus enables safe transportation. The Thermocontainer MAX offers 862 liters of volume in a compact 120x80 cm. Robust, lightweight design ensures safe, environmentally friendly transportation of food.

Why should you choose a thermocontainer?

Made of resistant EPS and robustly constructed, the thermo container offers high stability and is particularly suitable for the storage and transportation of medical products or perishable goods. Thanks to the flexible sizes and individual adaptations, the Thermocontainer can be tailored to specific requirements.

Furthermore, a well-sealed container minimizes convective heat loss by preventing hot air and steam from escaping, which is a major route for temperature drop in ...

FEURER insulated containers offer the ideal solution for the transportation and storage of temperature-sensitive products. Whether ...

From isothermal containers for transporting ice cream, to pallet boxes for temperature-controlled transport, through insulated EPP shells with cases and lids, each ...

Furthermore, a well-sealed container minimizes convective heat loss by preventing hot air and steam from escaping, which is a major ...

Looking for the best insulated food container to keep your meals hot or cold for hours? QNAND's leak-proof thermal food containers are designed for meal prep, catering, ...

The high-quality porcelain bowls, securely closed with a silicone lid, whet the appetite for the contents. GN containers and plastic stacking containers for a perfect organisation The range is ...

FEURER insulated containers offer the ideal solution for the transportation and storage of temperature-sensitive products. Whether food, medical products or sensitive goods ...

Airline catering needs to cope with the special environment of 10,000 meters above sea level: -50?~220? extreme temperature ...

Find out how Tower's Advanced Insulated Boxes (AIBs) provide both sustainable and cost-efficient onboard catering storage benefits.

CPET food containers are durable, heat-resistant, and recyclable packaging solutions. Ideal for bakeries, catering, and frozen meals, they protect food, enhance ...
