# Household uninterruptible power supply high power

What is a home UPS (uninterruptible power supply)?

Our Home UPS (Uninterruptible Power Supply) is a reliable device designed to provide continuous power to household appliances during electricity interruptions. It seamlessly switches to battery power, ensuring a stable and uninterrupted power supply for essential devices such as computers, routers, and home electronics.

Do you need an uninterruptible power supply?

But precision electronics like computers, gaming consoles, Smart TVs, and external hard drives are at far greater risk of damage from power interruptions than many home appliances. An uninterruptible power supply (UPS) is one of the best ways to protect sensitive electronics like desktop computers from irretrievable data loss and permanent damage.

How does an uninterrupted power supply work?

An uninterrupted power supply works by constantly monitoring output from the alternating current (AC) outlet the UPS is plugged into and automatically switching to direct current (DC) electricity from an onboard backup battery during interruptions such as voltage drops and blackouts.

Will a power outage damage my home appliances?

No. Blackouts are hard on all electronics, but a power cut is unlikely to damage most high-wattage home appliances. But if you want to keep your home up and running smoothly during a power outage, EcoFlow DELTA Pro 3 + Smart Home Panel 2 has got you covered.

In an era where technology dominates the household, a power outage often leads to costly interruptions in our daily activities and potential damage to our cherished devices. This article ...

An Uninterruptible Power Supply (UPS) is a device that provides emergency power to connected devices when the main power ...

However, a data-center level >10ms uninterruptible power supply is overkill for backing up high-wattage home appliances. EcoFlow ...

The APC UPS 2200VA Smart-UPS with SmartConnect earns the runner-up spot for its impressive power output and smart features. This model is ...
