
How many new energy stations are there in Algiers

What are Algeria's key energy projects in 2025?

Algeria is advancing several key energy projects in 2025, aimed at increasing natural gas production, expanding electricity generation and enhancing renewable energy capacity.

How many MW does Algeria's new power plant generate?

Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW. Both projects are expected to start operations in 2025 and are expected to enhance Algeria's power generation infrastructure while supporting energy security and fuelling the country's economic growth.

How many recharge stations will Algiers have by 2024?

Energy and Mines Minister Mohamed Arkab announced in Algiers on Sunday the installation of 277 recharge stations, with a target of 700 stations by 2024, as part of the infrastructure development for electric mobility.

How much electricity does Algeria generate a year?

Algeria currently generates a relatively small amount of its electricity (e.g., three percent or 686 MW annually), from renewable sources, including solar (448 MW), hydro (228 MW), and wind (10 MW).

Enhanced Desalination Program (2025-2030) Algeria has unveiled a plan to build seven new desalination plants between 2025 and 2030 in Tlemcen, Mostaganem, Tizi Ouzou ...

Gross electricity generation 2023, TWh (%): Fossil fuels 95.39 (99.1) Hydroelectricity 0.02 (0.0) Other renewable sources 0.89 (0.9)
