# How to connect the battery to the indoor small base station

How do I connect a backup battery to my house?

To connect your backup battery to your house, you'll need some essential tools: Circuit Breaker Panel: A main breaker panel where the battery will connect to your home's electrical system. Battery System: The backup battery you've chosen for your home. Wiring Kit: Wires to connect the battery to the breaker panel and other parts of the house.

How does a home battery backup system work?

Some home battery backup systems come with smart features that allow you to program and monitor the system via a mobile app or web interface. These systems can help you track your energy usage, set preferences for how your battery is charged and discharged, and even integrate with smart home devices.

How to install a battery?

Battery installation can be efficient and safe by following the proper steps. Here is what you need to prepare before installing the battery. Check the voltage and capacity, select the appropriate battery type, and check the manufacturer's instructions, as each type of battery has different installation guidelines.

What is a battery system & wiring kit?

Battery System: The backup battery you've chosen for your home. Wiring Kit: Wires to connect the battery to the breaker panel and other parts of the house. Inverter: An inverter converts DC (direct current) power from the battery into AC (alternating current) power used by most household appliances.
