
Kiev grid-side energy storage policy

Does Ukraine need a new electricity grid?

A recent United Nations Human Rights Monitoring Mission's report estimates that the country has lost at least 18 gigawatts of electricity capacity, half of which was destroyed in summer 2024 alone. So as winter sets in, Ukraine is rushing to rebuild its grid and restore its power generation. But the new grid will be markedly different from the old.

How will Ukraine's new grid be different from the old?

So as winter sets in, Ukraine is rushing to rebuild its grid and restore its power generation. But the new grid will be markedly different from the old. The country's developers are aiming to make it both more resilient and more modern through the use of distributed energy resources, digital twins, and smart meters.

How will a new energy package affect Ukraine?

It will also boost the security of supply in Ukraine and the wider region, as the Commission will assist with the necessary purchases of gas. Crucially, with a massive acceleration of domestic renewable power production, this package will increase the overall resilience of the Ukrainian energy system.

How will the EU & Ukraine cooperate on renewable gas?

Today in Kyiv, the Commission and Ukraine also agreed on a roadmap to step up cooperation on renewable gases. By providing alternative and cleaner supplies, this will strengthen energy security in the EU and in Ukraine, while supporting development and investments in the renewable gas sector in Ukraine.
