## Kuala Lumpur Megawatt Solar

When will Malaysia's large-scale solar projects start generating and supplying electricity?  
The large-scale solar generation projects - including one of Malaysia's largest floating solar projects with a capacity of 200 megawatts - will begin generating and supplying electricity in 2027 and 2028, the Ministry of Energy Transition and Water Transformation said in a statement.

How many large-scale solar projects has Malaysia approved?  
KUALA LUMPUR: Malaysia's government has approved 13 large-scale solar projects with a total capacity of 1,975 megawatts, the energy transition ministry said on Tuesday.

How many megawatts will a solar power plant produce?  
The ministry, through the Energy Commission, in January opened a bidding process under its fifth large-scale solar programme for contracts to supply a combined total of 2,000 megawatts worth of solar-generated electricity. Since the first such programme in 2016, 4,263 megawatts worth of solar generation have been approved, the ministry said.

Will nextree build a solar energy generating facility in Selangor?  
Nextree will design, construct, own, operate and maintain a solar photovoltaic energy generating facility in Kuala Langat, Selangor, with a capacity of 60 megawatt. The project's scheduled commercial operation date is Oct 8, 2027.
