Lima generator container

What is a Lima Mac generator?
Designed for 1 hp/kW,3 phase,Code G motor starting capability,the LIMA®MAC generator is self-regulated and self-excited,providing maximum reliability without external voltage regulation,adjustments,or electronic controls . . . a "hands off" generator supplying simplicity with minimum maintenance for any application.

Does my Lima® Mac generator need maintenance?
Routine Maintenance. Your Lima® MAC generator has been designed to be as reliable and trouble free as is possible. However,costly repairs and down time can be minimized by operating the unit under conditions that are compatible with those at which the equipment was designed to operate.

What is Lima & how do I use it?
The original goal of Lima was to promote containerd including nerdctl (contaiNERD ctl) to Mac users, but Lima can be used for non-container applications as well. Lima also supports other container engines (Docker, Podman, Kubernetes, etc.) and non-macOS hosts (Linux, NetBSD, etc.). Set up (Homebrew): To run Linux commands:

What is the power factor of a Lima Mac alternator?
Lima® MAC Refrigeration Duty alternators are rated at 80% (0.80) power factor. The . principal design concept of the Lima® MAC generator is to provide electrical power to operate three phase induction motor loads having operating power factors in the range of0.8 to 0.92,with voltage regulation well within public utility standards.
