## Low-pressure type folding containers from Türkiye for steel mills

What is a foldable steel storage container?

Foldable steel storage containers come in three lengths, each with a standard width of 2.1m. The smallest size is compact enough to be used as a garden shed, even in a small back garden in the most restricted of spaces. These products are also modular, so you can expand on storage space at any time by joining three units together.

Are foldable steel storage containers safe?

As well as being highly flexible, foldable steel storage containers are also very secure. They are made from galvanised steel which means they are theft and vandal proof.

What is a folding container?

Folding container varieties that can be manually installed are designed in detail as a system of interlocking components. The models which have folded size of 3.00 x 7.00 m length and 40 cm height or 2.40 x 6.00 m length and 40 cm height reach to 3.00 x 7.00 m length and 2.40 m height after installation.

What is a double steel storage container?

Double steel doors with dual locks are a deterrent to unauthorised access, and the steel structure of the container body makes them wind and waterproof and very resilient to damage. For more detailed technical details on foldable steel storage containers see our Containerstore information page.
