# New Energy Solar Air Conditioning in New York USA

How much does a solar AC cost?

We found that the investment in a solar AC generally pays for itself within 10 years of purchase. Angi reports the average homeowner spends \$3,400 on a solar air conditioner. In general, they cost \$1,600-13,000. Mini splits are more affordable, while solar-powered central air conditioners cost more.

Are solar air conditioners worth it?

Solar air conditioners usually cost more than traditional cooling systems. But the upfront expense is worth it to many because of the monthly energy savings. We found that the investment in a solar AC generally pays for itself within 10 years of purchase. Angi reports the average homeowner spends \$3,400 on a solar air conditioner.

Are solar-powered air conditioners more energy efficient?

For complete off-the-grid air conditioning, there are solar-only systems. These are more energy-efficient but don't offer the same flexibility as hybrid systems. Though solar-powered central air conditioners exist, most solar ACs are mini splits. Mini splits differ from central ACs because they don't require ductwork to operate.

Who makes solar AC?

With Lennox's reputation for cutting-edge technology, we're not surprised they're at the forefront of solar AC. HotSpot Energy makes solar-powered HVAC systems that are worth checking out. The brand hasn't been around for long, but it's Better Business Bureau accredited with an A+ rating. Other solar AC manufacturers include Carisol and GREE.
