
Outdoor power station factory in Brisbane

Why should you hire a Brisbane power station design team?

Great bunch of guys, super friendly and well organized. Our Brisbane team specialises in designing, building, and maintaining power stations to meet Queensland's diverse energy needs. From large-scale industrial setups to local projects, we deliver tailored solutions across the Brisbane Metro area and surrounding regions.

Where is poweroasis built?

The system is fully integrated, built and tested in our ISO 9001 Brisbane factory by RedEarth installers and engineers. Training or Factory Acceptance Testing (FAT) is available, contact us to learn more. PowerOasis is an ideal standalone off-grid system to run your entire mining camp, station or off-grid resort or residence.

Who is building Queensland's biggest battery energy storage system?

Construction has started on the 250MW/500MWh Swanbank Battery south of Brisbane, setting in progress one of Queensland's biggest battery energy storage systems, and the first to be built by the state's publicly owned utility CleanCo.

What is included in the Queensland power generating map?

The map also displays new and proposed power generating facilities. Inclusion of proposed projects in this map should not be interpreted to mean projects have in any way been endorsed by the Queensland Government. It is also important to note that many publicly announced projects may not proceed to completion.

Jackery's advanced solar generators and portable power stations, now at Bunnings Warehouse, provide a distinctive and environmentally friendly gift choice for outdoor enthusiasts.
