
Prices of solar modules in the UK

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 - £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2025, the price of solar panels in the UK can vary depending on several factors.

How much does a solar panel cost?

The cost of a solar panel system depends on several factors: System size: Measured in kilowatt-peak (kWp), larger systems cost more but generate more power. Panel type: Premium monocrystalline panels (£1,000-£1,500/kW) are pricier than polycrystalline (£900/kW) or thin-film (£400-£800/kW).

What are the cheapest solar panels in the UK?

The cheapest solar panels in the UK are typically polycrystalline models, which cost around £4,000-£5,000 for a small 3kW system. While they're less efficient than monocrystalline panels, they still offer a reliable and affordable way to cut energy bills.

Are solar panels cheaper in the UK 2025?

UK 2025 prices guide Solar panels are more affordable than ever, but prices still vary depending on your system size, roof type, and energy goals. Here's what you need to know
