
Romanian generator container

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system? Put simply, yes.

Why should you choose a containerised generator?

Containerised Generators are trusted across industries where reliability and resilience are non-negotiable, such as Healthcare and Rail infrastructure. Every unit can be tailored to your project with options for fuel type, noise attenuation, and space-saving layout.
