## Solar container battery exports surge

Should China be worried about oversupply in the energy storage sector?

Indeed, most overseas production capacity has been allocated to electric vehicles (EVs), limiting the local supply flowing into the energy storage sector, thus leaving a huge opportunity for China's exports. Nevertheless, Chinese manufacturers should be cautious of persistent oversupply in the energy storage segment.

Why are China's Solar Exports reducing?

As more markets continue to adopt local content requirements (LCRs), China will start to face increasing constraints for solar exports. In response to growing LCRs, Chinese players are globalising manufacturing capacity to offset a loss in exports. Energy storage investors expand overseas footprint
