Solar container battery share in the first half of 2025

After a 40% fall in 2024 in battery equipment costs, it's clear we're on track for another major fall in 2025. The economics for batteries are unrecognisable, and the industry is ...

New data from Rho Motion shows that over half of June's installations were concentrated in China, maintaining the country's dominance in the global energy storage market.

Total deployments for the first half of 2025 sits at 86.7GWh of battery energy storage system (BESS) capacity, up 54%.

Ember's report outlines how falling battery capital expenditures and improved performance metrics have lowered the levelized cost of storage, making dispatchable solar a ...

Batteries already made up 5.9 GW--about 26%--of new additions in the first half of 2025, with nearly half of those installations ...

In the first half of 2025, battery storage installations surged across key regions: Germany added over 255,000 residential energy storage units, ...

In the first half of 2025, battery storage installations surged across key regions: Germany added over 255,000 residential energy storage units, supported by rooftop solar adoption and ...

Ember's report outlines how falling battery capital expenditures and improved performance metrics have lowered the levelized cost of ...

New data from Rho Motion shows that over half of June's installations were concentrated in China, maintaining the country's ...

Batteries already made up 5.9 GW--about 26%--of new additions in the first half of 2025, with nearly half of those installations concentrated in Arizona and California. Texas is ...
