
Solar container price trend in the second half of 2025

Will market-based electricity pricing affect new solar projects in 2025?

Under this policy, new grid-connected solar projects will adopt market-based electricity pricing from June 1, potentially leading to a sudden drop in domestic module demand and lower prices in the second half of 2025.

How will the solar power market grow in 2025?

The shift to sustainable energy has caused the solar power market to grow worldwide.

According to SolarPower Europe, the worldwide solar market will double to 2.3 TW in 2025, compared to a global 1 TW capacity in 2022.

Will module prices rise in 2026?

Meanwhile, first-quarter 2026 prices climbed 3.61% to \$0.086/W, with higher price quotes ranging from \$0.083 to \$0.090/W. Market expectations on future module price trends remain divided. Some sources anticipate a continued price increase through the second half of 2025 into early 2026, driven by upstream supply cuts and weak module margins.

Why is there a module shortage in China in Q2 2025?

As a result, projects initially planned for the second half of 2025 are being frontloaded into Q2 2025, creating a perceived module shortage in China. This has limited export availability, providing support for DDP Europe prices.

Solar and storage developers face a sharp increase in equipment procurement costs from Q4 2025 onwards due to Chinese government policy changes and supply-side ...

With continued volatility expected in the second half of 2025, granular market intelligence and region-specific analysis are no longer optional--they're essential for staying ...

Ocean Freight Rate trends in late 2025 show volatility as capacity outpaces demand. Learn what drives rate changes and how ...

As a result, projects initially planned for the second half of 2025 are being frontloaded into Q2 2025, creating a perceived module shortage in China.

Industry sources noted that TOPCon module prices for the second half of 2025 were at a "premium" compared to spot or first-half 2025 prices, as manufacturers adjust pricing ...

The immediate mid-year forecast for shipping's core sectors predicts cloudy conditions in containers and dry bulk, but tankers enjoying a historic period in the sun. ...

The residential solar market installed 1,088 MWdc in Q3 2025, marking a 4% decline year-over-year and quarter-over-quarter. Based on the first three quarters of the year, total residential ...

The second half of 2025 is likely to bring firmer rates, tighter space, and heightened

uncertainty. With proactive planning and the right partnerships, businesses can stay ahead of ...

Explore the solar cost roadmap for 2025, analyzing price curves and average payback periods. Understand factors influencing solar energy investment returns and how ...

Solar and storage developers face a sharp increase in equipment procurement costs from Q4 2025 onwards due to Chinese ...
