
Solar panel assembly factory in Barcelona ??Spain

Are solar energy solutions a viable option in Spain?

Here's why solar energy solutions are an appealing proposition in Spain: The Abundant Sunlight: Spain is blessed with ample sunshine, averaging over 2,500 sunlight hours each year. Utilizing solar panels under such optimal conditions maximizes energy production, thereby significantly reducing electricity bills.

How many solar panels does Alstom use?

Alstom installs over 3,500 solar panels at its Barcelona industrial site. The solar energy project will have an installed peak power of 2,041 kWp, with an energy generation capacity equivalent to 26.5% of the factory's consumption. The site already has a certified and renewable energy purchase plan for 100% of its electricity consumption.

What incentives are available for solar energy installation in Spain?

Government Incentives: Spanish government's commitment to renewable energy has led to numerous incentives such as a reduction or elimination of energy taxes, subsidies for installation, and grants. These incentives significantly lower the cost of installing a solar energy system.

Where are Eurenor solar panels made?

Location and History: Eurenor is headquartered in Bigastro, Spain, and has been active in the solar industry since 1997. The company focuses on providing high-quality renewable energy solutions. Product Range and Advantage: Eurenor manufactures a variety of solar panels, including its premium monocrystalline range.
