
Solar panel slip seams

Can you install solar panels on a standing seam roof?

With our ClickFit™ EVO Standing Seam Roof, a mounting system specially developed for the most common types of standing seam roofs. For you, this means working more efficiently, with less fuss. The different pre-assembled seam clamp mean that you can install solar panels on single- or double-folded, snap and rounded seams.

Can you install solar panels on a rounded seam?

The different pre-assembled seam clamp mean that you can install solar panels on single- or double-folded, snap and rounded seams. You need just one tool to install ClickFit EVO Standing Seam Roof. ClickFit EVO Stand Seam Roof has only 4 components, for ultra-simple installation.

Can a slip sheet damage a solar racking system?

However, this configuration can cause wear and tear to the roof due to the weight and movement of the panels and panel support structure. Slip sheets are sacrificial rubber or plastic sheets designed for installation between the base mounts of the solar racking system and the surface of the roof.

How do I install solar panels?

To install solar panels, place the pre-assembled standing seam clamp on the seam and tighten the Torx screw. The smart ClickFit EVO Standing Seam Roof system has a high rigidity, which means that you can often skip standing seams on the roof when mounting rails horizontally. The result is a quicker installation and lower costs.

This guide details solar system selection for standing seam metal roofs, focusing on solar panel roof mounts and PV mounting brackets. Covering roof structure compatibility, ...
