
Solar panels installed in the balcony

Can a solar panel be installed on a balcony?

Whether you live in an apartment or an urban setting, installing a solar panel on balcony is a practical and eco-friendly way to generate your own electricity. In this guide, we'll walk you through the step-by-step process to install solar panels, what type is best for balconies, and how to maximize solar panels efficiency.

What are balcony solar panels?

Balcony solar panels are compact photovoltaic systems specifically designed for installation on apartment balconies, terraces, and small outdoor spaces. Unlike traditional rooftop installations, these systems are typically plug-and-play solutions that require no permanent modifications to the building structure.

How much does balcony solar cost?

When it comes to installing balcony solar, it's likely that you won't be able to fit more than two standard sized (350-400W) panels that are mains-connected. Straight away this limits your cost. With each standard size panel costing between £450 and £650, you can expect to pay a maximum of £1,300 for two full size panels.

Are solar panels suitable for balconies?

There are two main types of solar panel systems suitable for balconies: Plug-in solar panel options are designed for easy setup and don't require professional installation. All that's required is that the panels are placed on the balcony in a spot that receives the most direct sunlight.
