# Tariffs on the export of solar modules from Port Moresby

Which solar companies do not incur import tariffs?

Other "Domestic" Suppliers: A few manufacturers with U.S.-based production or assembly - such as Hanwha Qcells (Georgia factories), First Solar (Ohio), Mission Solar (Texas), and Silfab (Washington) - do not incur these import tariffs on their U.S.-made panels. They have an effective price advantage now.

Why did solar module prices rise in Q1 2025?

U.S. solar module prices were already inching up in late Q1 2025 due to trade policy signals, and the April tariffs accelerated this trend. After a long period of decline, the market saw a \$0.01/W (4%) uptick to about \$0.26/W average in December 2024, reflecting anticipation of new import costs.

What tariffs are imposed on Chinese solar cells & modules?

The U.S. had imposed several trade barriers against Chinese solar cell and module imports. In addition to the original 25% tariff under the Section 301, there are anti-dumping and countervailing duties (AD/CVD) that have been imposed since 2012 as well as the Section 201 tariffs targeting cells and modules from all countries.

What is a solar tariff?

A solar tariff is an additional fee or tax that a country charges on various types of solar power equipment imported into its borders by manufacturers that are based in another country. Often this is added to solar modules (panels), module components, and the raw materials needed to make modules, but it can include other components as well.
