
UK container ship generator prices

What is a containerised generator?

With sound proofing by means of the acoustic lined container that is both lockable and weather proof - these are usually installed outside a building in a car park or outside the intake room. Containerised generators are usually larger generators above 500kVA and upward, and are 80dbA @1 metres noise level. We can make these even more silent.

Why should you choose a containerised generator?

Fire Detection Panels and Intruder Alarms: Enhanced safety and security. Our containerised generators are suitable for a wide range of applications, including: Super Silent: Super silent 65dBA at 1m for prime power running diesel and gas. Critical Backup Power: For MOD, NHS, and HMP sites, ensuring reliable performance in emergencies.

How much does it cost to ship a generator?

The cost to ship a generator can vary quite a bit, from a few hundred dollars for a small, residential standby generator, to thousands of dollars for a large industrial generator. Shipping costs are typically charged at a per-mile rate.

How does a diesel generator soundproof a container?

We build each container from scratch with special louvres for free flow ventilation, which reduces the external sound levels and maintains the optimum diesel engine efficiency. We accomplish maximum soundproofing by lining the container with extra thick insulation to absorb the noise emitted from the operational diesel generator engine.
